The Overview

The purpose of this whitepaper is to set a streamlined vision for expansion and creation of Majestic Coin in the African, Asian, and European markets. This document will outline the feasibility of implementing the exact structure, eco-system and vision of Majestic Coin in the crypto world. This document will provide the solution in a volatile market, thus proving to be a one of a kind coin. This paper is not all encompassing, rather merely a start to write down a road map to success. The guarantee of that success will be through execution, adaptability and confidence to make the plan unbreakable.

The Introduction

Gone are the days of trusting in banks, fiat currency and the like. We are in a time period unlike any other. We are essentially in a revolution. There is a moving train and the brakes don't work.

Banks have tried to stop this movement, governments have tried to stop this force, but this train can't be stopped. This train is moving full steam headed by the little guy.

The little guy is winning, the little guy is millions of people globally who have decided that their financial future should not be controlled by the select few. The little guy is you.

We are certainly in a new age, and a new age requires new reformation, new perspective, and new action. The way we see money, or even view money is changing. This brand new world

of cryptocurrency is turning the financial industry on its head. Seasoned bankers are scratching their scalps trying to understand a millennial language.

What is Bitcoin, or Ethereum, or DogeCoin? How could a meme coin create a wave of new millionaires? What is a coin anyway, and what does it look like? Indeed we are in a revolution, where one can have money without ever holding it.

We live in a time when the average Joe or Jane can create their own currency, and the masses are buying it!

Flash in the pan millionaires are threatening the whales, finally the plankton are winning!

Enter Majestic Coin.

The Majestic coin is simply... majestic. The creme de le creme, the corps de elite, the caviar of crypto, it's the future. The vision of Majestic Coin is grandiose, but not unrealistic, futuristic yet simplistic. Give the people a coin that has real value, and give it to them now. Raise thy royal middle finger and give the big banks the salute they deserve! We are talking about complete financial freedom. That's our vision. No pump and dumps, no overly-hyped technical jargon that only coders understand. This coin will stand the test of time because it is backed by something that transcends all fiat history. What was past will sustain the future, and our future is bright, its majestic! We are talking about transactional currency which was the original aim of the creation of cryptocurrency. We are not just a speculative coin for investing, rather a true currency to transact freely from banking oversight anywhere and anytime. We are talking peer to peer, b2b, b2c, humans to aliens...yes even aliens. So what gives us complete confidence that this coin will be the superior cryptocurrency? I'm glad you asked.

Creme de le creme, corps de elite, the caviar of crypto. This is the future.

The Vault

The Majestic Coin finds its true value in hard assets, and in this case precious minerals, and precious mineral lands. We have strategically brokered relationships for the last 6 years to give the Majestic Coin a true currency value that will be sustained despite the volatility of fiat or crypto markets. Mineral rich lands have been bought and acquired for the creation of a one of a kind currency, and instead of hoarding billions of dollars worth of real estate and squatting, we decided to share the wealth with the people. We are taking our government awarded concessions and creating a revolution! Finally a crypto currency backed by the good stuff. Gold, diamonds, rubies, sapphires, uranium and a plethora more of minerals are the backing power of Majestic Coin.

The Majestic Coin currently has over 400,000 hectares of mineral rich land. That's 4,000 square kilometers or 2.2x the size of London, and our numbers are growing. Government awarded and appraised mining concessions from the Nile to the Congo is being used not only to create a new coin, but a new way of living for many miners and farmers in their respective countries. On top of having our own land and licenses, we have partnered with over a consortium of 500 miners to work in tandem for the creation of this coin.

Concession owners who contribute their land for the coin receive coins in return, and they are able to finance their own mining projects by simply using the wealth that's under their feet. Ingenious! Far too long the global gangsters have looted Africa and left the people with holes in their pockets and war-torn lands.

What rises out of the dust is the cell phones in your hands from rich cobalt and colton lands, yet the people are left starving and wanting. We have taken the initiative to bring financial justice, and justice always prevails. Righting wrongs that have been perpetuated for years, not voiceless pleas that fall on iron ears, but by changing the game completely. Through the long and arduous process of educating the people, educating the little guys, we have created a unified scholar.

Arm in arm we are linked with millions of people tired of the tyranny of self absorbed maniacs, controlling our pockets, controlling our banks, controlling our food and controlling our future. We have thrown our collective assets in the pot, sacrificing land and pride to create a new tomorrow. In the end WE WIN.

The Majestic Coin opening market cap is valued at 1 billion dollars on an evaluation of just one of our concessions totaling 67 hectares. This isn't even a sliver of our overall total. Strategically, the Majestic coin team will infuse minerals and land every 30 days behind the coin thus raising its value. By doing so we will eliminate the pump and dump players, and will always maintain a strong financial floor price. For the Majestic Coin, upwards is the only direction to go. In addition to the adage of assets on a periodic schedule, we will burn a percentage of uncirculated coins, thus continually increasing the value of Majestic Coin .

Our intention is to give out space boots to as many Majestic Freaks as possible because our next stop is the moon!

iOS/Android Majestic Wallet

For every great treasure there must be a safe treasury. There must be security without fail and full assurance that the one in control of that treasury is the owner of that treasure. The Majestic Wallet is created for one purpose, complete freedom from the current banking system. We are putting all the power in your hand, and now you become your own Decentralized bank. No more intermediaries who can freeze your account at whim, no lending out your money every time you deposit funds, no more subjection to a system that can care less about you. With the Majestic Wallet you can store more than 60 crypto currencies including the Majestic Coin. Majestic users will have the peace of mind of transferring amongst themselves with no gas fee. The power of choice has never been greater.

Solved.

The chief problem with crypto currency is the ease of converting fiat to crypto in large sums without creating alarms with your current banksters. Banks are still at odds with crypto investments, and do their very best to discourage or even block transactions to crypto platforms. We are changing the game. Majestic Wallet has its own on-boarding ramp that allows any client to easily purchase Majestic coin. With Majestic Wallet, Majestic users can do wire transfers directly with our unique onboard fiat to crypto ramp. Whether you are in Asia, North America, India or Africa you can now start the process of becoming your own banker by converting your cash to the new premier currency; the Majestic Coin.

Yield Stake and Rake

Earn money anywhere, anytime. Stake MJT and earn! More power to the people!

In addition to having your own bank, Majestic Wallet allows the option for users to stake the Majestic Coin and earn a high yield for holding down the fort! Staking is simply holding a crypto for a period of time and getting interest for doing so! Therefore, instead of just holding your money in Majestic Wallet, you can stake it for a time and earn rewards on your unused money. Power to the people!

Spend Wisely

Visa and MasterCard Debit Card

Having the ability to spend your Majestic Coin freely is the separating factor between our Coin and Wallet and others on the market.

All users can order their very own visa debit or mastercard and use their Majestic Coin just like any other global fiat currency. You can withdraw funds, pay for meals, even go on a shopping spree. We are bringing the comfort of banking tools to our users without the bankers. You're welcome!

Have you ever asked yourself, How can I change the world? Have you ever wondered if your life would leave a legacy, a footprint for history to follow? Have you ever wanted to be part of something greater than yourself and create a generational change? If you are reading this, seeing this, then you are called to be part of that integral force. A force to be reckoned with. We are one universal consciousness on the edge of change. We have the power in numbers to exit a corrupt system and create a new tomorrow. We are breaking out the womb of a prefabricated matrix, free falling toward liberty. Majetic Coin is more than a currency, it is a prophetic picture of a new way of living. It is an omen to the power that be, that change is here and we are taking it by force. A new kingdom is rising, a generation full of generals marching in unity. We are the change, we are the future, we are Majestic Coin!

Think bigger.

” Sometimes, it falls upon a generation to be great. You can be that great generation. Let your greatness blossom ”
